"Construction Solutions for the Future"

Technical Services

From Design...

Titan Construction & Engineering Services is a **Design/Build** general contractor. We can take your project from idea to reality. Our engineering staff designs your project to meet your needs. Construction drawings are completed by our in-house drafting department. Our construction management team & field crews will then go to work. **Design/Build** is the fastest, most cost-effective construction method available. Also, typical project construction can be reduced by 30% over conventional architectural bid-spec methodology.

Design/Build offers the most flexibility, giving you the choice you need to build exactly what you want.

Contact us today to discuss your needs with one of our facilities planners. Let us serve you!
